Journal of PHOTOCHEMISTRY AND PHOTOBIOLOGY A:CHEMISTRY

Subject Index of Volume 99

Action spectrum
degradation/decoloration of concentrated solutions of Orange II. Kinetics and quantum yield for sunlight induced reactions via Fenton type reagents, 57
Adduct formation
dynamics of light-induced excited state quenching of ferrioxalate complexes by peroxides. Fast kinetic events and interaction with toxic pollutants, 145
Aggregate formation
dynamics of aggregate formation and translational diffusion of a spiropyran studied by the transient grating method, 155
Amidobenzophenone
photochemistry and photoinitiator properties of 4-substituted amidobenzophenones and imidobenzophenones, 191

Back electron transfer
does back electron transfer within geminate redox pairs formed in bimolecular quenching follow a Marcus bell-shaped energy gap dependence?, 9
Benzoin
picosecond investigation of the effect of solvent on the photochemistry of benzoin, 93
Benzophenone
on the yield of intermediates formed in the photoreduction of benzophenone, 51
5,6-Benzoquinoline
the fluorescence quenching of 5,6-benzoquinoline and its conjugate acid by Cl^-, Br^-, SCN^- and I^- ions, 29
Bimetallic complexes
fluorescence properties of Eu^{3+}–polyacrylic acid derivative and its bimetallic complexes, 121
Bimolecular quenching
does back electron transfer within geminate redox pairs formed in bimolecular quenching follow a Marcus bell-shaped energy gap dependence?, 9
Biochemical systems
the lanthanides as luminescent probes in investigations of biochemical systems, 85

Carboxylic acids
hydroxyl radical induced decomposition of aliphatic acids in oxygenated and deoxygenated aqueous solutions, 137
α-cleavage
picosecond investigation of the effect of solvent on the photochemistry of benzoin, 93
Condensed phase
on the yield of intermediates formed in the photoreduction of benzophenone, 51

Diad complex
excited state properties of bis-tetraazaphenanthrene–Ru(II) diad complexes with a ferrocenyl unit, 127

Elsevier Science S.A.

4,4′-Diaminostilbene
UV-visible absorption and fluorescence studies of 4,4′-diamino-*trans*-stilbene and its protonated species, 23
Dimer
aggregation and the photoelectric behavior of tetrasulfonated phthalocyanine adsorbed on a TiO_2 microporous electrode, 71

Enhanced energy transfer
enhanced excitation energy transfer in microdroplets — a study by time-resolved fluorescence microscopy, 165
Environmental pollutants
enhanced photocatalytic degradation of π-donor organic compounds by *N,N*′-dialkyl-4,4′-bipyridinium-modified TiO_2 particles, 185
Eu^{3+}–PAAAB complex
fluorescence properties of Eu^{3+}–polyacrylic acid derivative and its bimetallic complexes, 121
Exciplex fluorescence
formation and decay of intramolecular exciplexes and bond homolysis of ((*N,N*-dimethylamino)methyl)arenes, 103

Fast kinetics
dynamics of light-induced excited state quenching of ferrioxalate complexes by peroxides. Fast kinetic events and interaction with toxic pollutants, 145
Fe oxalate
dynamics of light-induced excited state quenching of ferrioxalate complexes by peroxides. Fast kinetic events and interaction with toxic pollutants, 145
Ferrocenyl diad complex
excited state properties of bis-tetraazaphenanthrene–Ru(II) diad complexes with a ferrocenyl unit, 127
Flash photolysis
excited state properties of bis-tetraazaphenanthrene–Ru(II) diad complexes with a ferrocenyl unit, 127
Flavonoids
the dissipation of excitation energy in methoxyflavones by internal conversion, 97
Fluorescence
photoluminescence and fluorescence quenchings of C_{60}- pyrrolidine derivatives at room temperature, 37
the dissipation of excitation energy in methoxyflavones by internal conversion, 97
Fluorescence properties
fluorescence properties of Eu^{3+}–polyacrylic acid derivative and its bimetallic complexes, 121
Fluorescence quenching
the fluorescence quenching of 5,6-benzoquinoline and its conjugate acid by Cl^-, Br^-, SCN^- and I^- ions, 29
Fullerene
photoluminescence and fluorescence quenchings of C_{60}- pyrrolidine derivatives at room temperature, 37

Geminate redox pairs
does back electron transfer within geminate redox pairs formed in bimolecular quenching follow a Marcus bell-shaped energy gap dependence?, 9

Halide ions
the fluorescence quenching of 5,6-benzoquinoline and its conjugate acid by Cl^-, Br^-, SCN^- and I^- ions, 29
Hydrogen peroxide
hydroxyl radical induced decomposition of aliphatic acids in oxygenated and deoxygenated aqueous solutions, 137
Hydroxyl radicals
hydroxyl radical induced decomposition of aliphatic acids in oxygenated and deoxygenated aqueous solutions, 137

Imidobenzophenone
photochemistry and photoinitiator properties of 4-substituted amidobenzophenones and imidobenzophenones, 191
Intermediates
on the yield of intermediates formed in the photoreduction of benzophenone, 51
Intersystem crossing
formation and decay of intramolecular exciplexes and bond homolysis of ((*N*,*N*-dimethylamino)methyl)arenes, 103
Irradiation
a study on ethylene and acetylene photoligomerization and photopolymerization, 75

Ketyl radicals
on the yield of intermediates formed in the photoreduction of benzophenone, 51
Kinetics
on the yield of intermediates formed in the photoreduction of benzophenone, 51
degradation/decoloration of concentrated solutions of Orange II. Kinetics and quantum yield for sunlight induced reactions via Fenton type reagents, 57

Lanthanides
the lanthanides as luminescent probes in investigations of biochemical systems, 85
Laser
laser sensitized dissociation of tetramethyl germane, 1
Laser photolysis
dynamics of light-induced excited state quenching of ferrioxalate complexes by peroxides. Fast kinetic events and interaction with toxic pollutants, 145
Light absorbing transients
on the yield of intermediates formed in the photoreduction of benzophenone, 51
Luminescent probes
the lanthanides as luminescent probes in investigations of biochemical systems, 85

Malachite green
enhanced excitation energy transfer in microdroplets — a study by time-resolved fluorescence microscopy, 165
Marcus bell-shaped energy dependence
does back electron transfer within geminate redox pairs formed in bimolecular quenching follow a Marcus bell-shaped energy gap dependence?, 9
Methylviologen
the effect of methylviologen on the photoluminescence bands of quantum-sized CdS, 177
Microdroplet
enhanced excitation energy transfer in microdroplets — a study by time-resolved fluorescence microscopy, 165
Mineralization
degradation/decoloration of concentrated solutions of Orange II. Kinetics and quantum yield for sunlight induced reactions via Fenton type reagents, 57
Molecular probe
UV-visible absorption and fluorescence studies of 4,4′-diamino-*trans*-stilbene and its protonated species, 23
Morphology-dependent resonance
enhanced excitation energy transfer in microdroplets — a study by time-resolved fluorescence microscopy, 165

Nanosecond laser pulse
photoionization mechanism of α,ω-diphenylpolyenes in polar solvents investigated by using coherent Raman spectroscopy, 13

$^{\bullet}OH$ radicals
dynamics of light-induced excited state quenching of ferrioxalate complexes by peroxides. Fast kinetic events and interaction with toxic pollutants, 145
Orange II
degradation/decoloration of concentrated solutions of Orange II. Kinetics and quantum yield for sunlight induced reactions via Fenton type reagents, 57
Organic peroxyl
hydroxyl radical induced decomposition of aliphatic acids in oxygenated and deoxygenated aqueous solutions, 137
Oxygen
hydroxyl radical induced decomposition of aliphatic acids in oxygenated and deoxygenated aqueous solutions, 137

Peroxides
dynamics of light-induced excited state quenching of ferrioxalate complexes by peroxides. Fast kinetic events and interaction with toxic pollutants, 145
Phenol
dynamics of light-induced excited state quenching of ferrioxalate complexes by peroxides. Fast kinetic events and interaction with toxic pollutants, 145
Phosphorus(III) complex
study on phosphorus(III) complex of tetrabenzotriazacorrole: A novel phthalocyanine-like photosensitizer, 115
Photocatalysis
enhanced photocatalytic degradation of π-donor organic compounds by *N*,*N*′-dialkyl-4,4′-bipyridinium-modified TiO_2 particles, 185
Photocatalyst
photoredox reactions of ArXCOOH (X = CH_2, OCH_2, SCH_2, $SOCH_2$ or SO_2CH_2) on TiO_2, 67
Photochemical degradation
enhanced photocatalytic degradation of π-donor organic compounds by *N*,*N*′-dialkyl-4,4′-bipyridinium-modified TiO_2 particles, 185
Photochemistry
photochemistry and photoinitiator properties of 4-substituted amidobenzophenones and imidobenzophenones, 191
Photocurrent
aggregation and the photoelectric behavior of tetrasulfonated phthalocyanine adsorbed on a TiO_2 microporous electrode, 71
Photo-electron transfer
excited state properties of bis-tetraazaphenanthrene–Ru(II) diad complexes with a ferrocenyl unit, 127
Photoinduced electron transfer
formation and decay of intramolecular exciplexes and bond homolysis of ((*N*,*N*-dimethylamino)methyl)arenes, 103
Photoinitiator properties
photochemistry and photoinitiator properties of 4-substituted amidobenzophenones and imidobenzophenones, 191
Photoinitiators
triplet state and photolysis of *S*-phenyl 1-thionaphthoate, 45

Photoionization
photoionization mechanism of α,ω-diphenylpolyenes in polar solvents investigated by using coherent Raman spectroscopy, 13
Photoligomerization
a study on ethylene and acetylene photoligomerization and photopolymerization, 75
Photoluminescence
photoluminescence and fluorescence quenchings of C_{60}- pyrrolidine derivatives at room temperature, 37
the effect of methylviologen on the photoluminescence bands of quantum-sized CdS, 177
Photolysis
triplet state and photolysis of *S*-phenyl 1-thionaphthoate, 45
Photophysics
UV-visible absorption and fluorescence studies of 4,4′-diamino-*trans*-stilbene and its protonated species, 23
Photopolymerization
a study on ethylene and acetylene photoligomerization and photopolymerization, 75
Photoredox
photoredox reactions of ArXCOOH ($X = CH_2$, OCH_2, SCH_2, $SOCH_2$ or SO_2CH_2) on TiO_2, 67
Photoreduction
on the yield of intermediates formed in the photoreduction of benzophenone, 51
Photosensitization
study on phosphorus(III) complex of tetrabenzotriazacorrole: A novel phthalocyanine-like photosensitizer, 115
Phthalocyanine
study on phosphorus(III) complex of tetrabenzotriazacorrole: A novel phthalocyanine-like photosensitizer, 115
Picosecond transient absorption
picosecond investigation of the effect of solvent on the photochemistry of benzoin, 93
Plants
the dissipation of excitation energy in methoxyflavones by internal conversion, 97
Proximity effect
the dissipation of excitation energy in methoxyflavones by internal conversion, 97
Pyrrolidine
photoluminescence and fluorescence quenchings of C_{60}- pyrrolidine derivatives at room temperature, 37

Quantum-sized CdS
the effect of methylviologen on the photoluminescence bands of quantum-sized CdS, 177
Quantum yields
degradation/decoloration of concentrated solutions of Orange II. Kinetics and quantum yield for sunlight induced reactions via Fenton type reagents, 57
Quenching
photoluminescence and fluorescence quenchings of C_{60}- pyrrolidine derivatives at room temperature, 37
Quenching of complexes
dynamics of light-induced excited state quenching of ferrioxalate complexes by peroxides. Fast kinetic events and interaction with toxic pollutants, 145

Radiative lifetime
enhanced excitation energy transfer in microdroplets — a study by time-resolved fluorescence microscopy, 165
Radical formation
formation and decay of intramolecular exciplexes and bond homolysis of ((*N*,*N*-dimethylamino)methyl)arenes, 103
Raman spectroscopy
photoionization mechanism of α,ω-diphenylpolyenes in polar solvents investigated by using coherent Raman spectroscopy, 13
Rhodamine 6G
enhanced excitation energy transfer in microdroplets — a study by time-resolved fluorescence microscopy, 165
Ru complexes
excited state properties of bis-tetraazaphenanthrene–Ru(II) diad complexes with a ferrocenyl unit, 127

Semiconductors
enhanced photocatalytic degradation of π-donor organic compounds by *N*,*N*′-dialkyl-4,4′-bipyridinium-modified TiO_2 particles, 185
Sensitizer
laser sensitized dissociation of tetramethyl germane, 1
Simulation
laser sensitized dissociation of tetramethyl germane, 1
Singlet oxygen
study on phosphorus(III) complex of tetrabenzotriazacorrole: A novel phthalocyanine-like photosensitizer, 115
Size effect
enhanced excitation energy transfer in microdroplets — a study by time-resolved fluorescence microscopy, 165
Solid–electrolyte interface
aggregation and the photoelectric behavior of tetrasulfonated phthalocyanine adsorbed on a TiO_2 microporous electrode, 71
Spectroscopy
UV-visible absorption and fluorescence studies of 4,4′-diamino-*trans*-stilbene and its protonated species, 23
Spiropyran
dynamics of aggregate formation and translational diffusion of a spiropyran studied by the transient grating method, 155
Sunlight irradiation
degradation/decoloration of concentrated solutions of Orange II. Kinetics and quantum yield for sunlight induced reactions via Fenton type reagents, 57
Superoxide anion
study on phosphorus(III) complex of tetrabenzotriazacorrole: A novel phthalocyanine-like photosensitizer, 115
Supramolecular photochemistry
enhanced photocatalytic degradation of π-donor organic compounds by *N*,*N*′-dialkyl-4,4′-bipyridinium-modified TiO_2 particles, 185

Tetrabenzotriazacorrole
study on phosphorus(III) complex of tetrabenzotriazacorrole: A novel phthalocyanine-like photosensitizer, 115
Tetramethyl germane
laser sensitized dissociation of tetramethyl germane, 1
Tetrasulfonated phthalocyanine
aggregation and the photoelectric behavior of tetrasulfonated phthalocyanine adsorbed on a TiO_2 microporous electrode, 71
Thiocyanate ions
the fluorescence quenching of 5,6-benzoquinoline and its conjugate acid by Cl^-, Br^-, SCN^- and I^- ions, 29
Time-resolved fluorescence microscopy
enhanced excitation energy transfer in microdroplets — a study by time-resolved fluorescence microscopy, 165
Titanium dioxide
photoredox reactions of ArXCOOH ($X = CH_2$, OCH_2, SCH_2, $SOCH_2$ or SO_2CH_2) on TiO_2, 67
aggregation and the photoelectric behavior of tetrasulfonated phthalocyanine adsorbed on a TiO_2 microporous electrode, 71

Transient grating method
dynamics of aggregate formation and translational diffusion of a spiropyran studied by the transient grating method, 155
Translational diffusion
dynamics of aggregate formation and translational diffusion of a spiropyran studied by the transient grating method, 155
4-Trimethylammonium-4′-aminostilbene hydrogen sulfate
UV-visible absorption and fluorescence studies of 4,4′-diamino-*trans*-stilbene and its protonated species, 23
Triplet states
triplet state and photolysis of *S*-phenyl 1-thionaphthoate, 45
UV irradiation
hydroxyl radical induced decomposition of aliphatic acids in oxygenated and deoxygenated aqueous solutions, 137
UV protection
the dissipation of excitation energy in methoxyflavones by internal conversion, 97
